DIABETIC TRAINING

~~STAFF MEMBER:~~

Phil Bennett 9/11/19
RPA

DATE OF TRAINING:

PRESENTED BY:

Diana Dew, RN
Administrator

TRAINING CONTENT:

1. **Dietary Requirements**
 - a. Portion control
 - b. Limiting concentrated sweets
 - c. Awareness of carbohydrates
2. **Anti-Diabetic Oral Medications**
3. **Insulin mixing, action, and storage**
 - a. Refrigerator all insulin
 - b. Date all insulin when opened
 - c. Insulin must be discarded 30 days after opening, except Lantus which must be discarded after 28 days
 - d. When mixing insulin, clear insulin then cloudy insulin
 - e. Shaking insulin administration
 - f. Assume correct kind/type of insulin
4. **Injection techniques and site rotation**
 - a. Keeping insert device clean
 - b. Remove insert after use
 - c. Do not recap needles
5. **Review of hypoglycemia and hyperglycemia, signs and symptoms and treatment, prevention**
6. **Foot care**
7. **Lab testing, urine testing, and blood glucose monitoring**
8. **Standard Precautions**

[Handwritten Signature]
10-15-19

Phillip Bennett
RFA

- 2) Hooking up and turning on
- 3) Following doctor's orders
- 4) Frequent safety checks
- 5) Planning ahead for oxygen needs
- 6) Knowing what to do in different situations

RFA

Inhalers and Spacers

Inhalers are medication prescribed by the resident's physician to open airways that may be blocked due to asthma, emphysema and many other lung diseases.

Inhalers come in many different types and are used to dilate the airways, decrease the inflammation in the airway and also to prevent future episodes of airway constriction.

How to use an inhaler:

1. Shake the inhaler before each inhalation.
2. Remove the cap from the mouthpiece.
3. Hold the inhaler up to 2 inches away from your open mouth. Least preferably, use the closed-mouth method by placing the mouthpiece of the inhaler in the resident's mouth and closing lips tightly.
4. Instruct resident to breathe in deeply and slowly through their mouth while pressing firmly down on the canister. Resident will continue to inhale, then try to hold their breath 5-10 seconds before breathing out. Wait one minute between the next inhalation.
5. Clean inhaler thoroughly after each use by rinsing under warm, running water.

Use of a spacer with the inhaler.

Spacers are used so that the resident is able to receive the full dose of medication and to prevent yeast infections in the mouth when using a steroid inhaler. Attach the inhaler to the spacer and shake well. Press the canister releasing the medication into the chamber. Place the mouthpiece in resident's mouth and ask resident to inhale slowly. Instruct resident to hold breath a few seconds and then exhale. Wait one minute between inhalations.

Nebulizer Training:

Phillip Bennett 9/11/19
RFA

1) How to assemble

- a) power source
- b) wash hands
- c) flat surface
- d) connect tubing
- e) assemble parts

2) Medication

- a) follow all protocol
- b) regulations- follow all regulations
- c) unit dose vial-administer per doctor's order

3) Caring for the nebulizer

- a) taking nebulizer apart
- b) washing parts

4) Trouble shooting

- a) machine won't mist

5) Replacing Tubing, parts and pieces

Oxygen:

1) Different Modalities

- a) Concentrator
- b) Portable tanks
- c) Large nonmobile tank
- d) Cleaning all
- e) Replacing tubing, parts, and pieces, etc.
